## Guangzhou Beian Lock Technology Co., Ltd.

Incorporated in early 2014, Guangzhou Beian Lock Technology Co., Ltd is a professional company which is committed to advocating the safety conception of "preventative safety first; locked-out safety second" and provides a series of safety solutions for safety padlocks, safety valve lockouts, cable lockouts, lockout hasps, electric breaker lockouts and lockout station.

The company introduces advanced manufacturing levels and concepts adopted among international peers and focuses not only on the R&D and manufacturing of new products but even more on product quality in order to supply reliable safety protection articles for all customers and create a professional, standard and safe operation condition for all staff members.

### Beian-lock Advantage ▼

1. Guangzhou Beian Lock Technology Co.,Ltd, covering an area of 1150 square meters, has a large production base and a systematic production system, and produces thousands of products annually. We have the strength of developing new products and non-standard products, 100% quality inspection can be delivered, and the product quality is guaranteed. Independent production, fully meets your purchase order requirements in result that we have complete production line, large warehouse area and sufficient stock; Hundreds of products are all self-produced and sold with high quality and reasonable price, the logistics distribution system is perfect, 100% cargo guarantee.

2. We have a strong team group, sales engineers over 20, R&D engineers more than 30; LOTO procedure training lecturers more than group of 10, etc. Independent research and continuous innovation is driven by customer needs and customization. We made dozens of appearances and utility models and invention patents and got CE certificate, ROHS certification in United States, domestic GB/T29490-2013 third-party certification, ISO9001 etc.

3. BEIAN-LOCK enters global market rapidly depended on product's superior quality, we establish long-term friendly relations with End-users & Suppliers all over the world.

4. BEIAN-LOCK with its high strength cooperates with many domestic and foreign authority of state-owned enterprises, joint venture enterprises, etc. The product application covers widely, such fields including petroleum, chemical, pharmaceutical, steel, electricity, heavy industry, manufacturing, and extension engineering, power engineering and other places. We provide LOTO project design, implementation of programme training and supply safety LOTO products. Our service is recognized and highly praised from our customers.

# Industrial Smart Padlock

## S201 New Product

### Fingerprint padlock

- Fingerprint Management
- OSHA
- Second-grade management
- Data uploading
- Low power alert
- 95mmx46mmx23.5mm
- Application: steel, petroleum, chemistry, mechanical engineering, vehicle, electric factories and engineering projects.

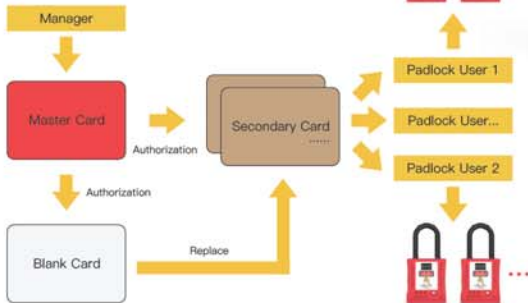

OSHA standard	OSHA standard
Physical Stability	Physical Stability
Smart Fingerprint Unlocking <small>(Safer and convenient management)</small>	General Key Unlocking <small>(Easy lost, hard for tracing)</small>
Authorize second grade management	Artificial second grade management
Light	Heavy

Comparison to S201 and SC201  
As to SK201, wider personnel management, suitable to all factories and engineering applications.  
As to SC201, featured in fingerprint unlocking, higher security.

## SC201 New Product

### IC padlock

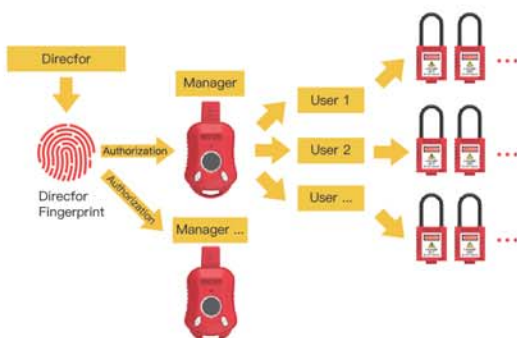

OSHA standard	OSHA standard
Physical Stability	Physical Stability
Smart IC CARD Unlocking <small>(Safer and convenient management)</small>	General Key Unlocking <small>(Easy lost, hard for tracing)</small>
Authorize second grade management	Artificial second grade management
Light	Heavy

Comparison to S201 and SK201  
Convenient for IC card management, customized by adjusting their own management modes (Employee card, NFC, ETC)  
Application: steel, petroleum, chemistry, mechanical engineering, vehicle, electric factories and engineering projects.

## SK201 New Product

### Passive padlock

OSHA standard	OSHA standard
Physical Stability	Physical Stability
Smart Fingerprint Unlocking <small>(Safer and convenient management)</small>	General Key Unlocking <small>(Easy lost, hard for tracing)</small>
Authorize second grade management	Artificial second grade management
Light	Heavy

Comparison to S201 and SC201  
Lower cost, suitable to small and medium sized factories  
Application: steel, petroleum, chemistry, mechanical engineering, vehicle, electric factories and engineering projects.

## Smart Padlock

### S1

#### Fingerprint padlock

- Fingerprint management(10/40/100)
- IP66
- Three-grade management
- Mutual charging function
- Reinforced alloy steel shackle
- Low power alert
- 90mm×56mm×38mm

### S3

#### Fingerprint padlock

- Fingerprint management(10/40/100)
- IP66
- Three-grade management
- Mutual charging function
- Reinforced alloy steel shackle
- Low power alert
- 83mm×49.5mm×23mm

## Smart U Locks

# US4

## Smart U Locks

- One-click settings
- Anti-Hydraulic shear
- 0.5s unlocking
- 10 fingerprints
- Low Power Alert
- Waterproof IP66

### PARAMETER

Housing material

Zinc alloy lock body

Shackle material

Anti-hydraulic shear shackle
